## About

Flash developer from Auckland, New Zealand. I have various digital work experiences in both agencies and working as a freelancer. Interested in new job opportunities internationally and work in an environment which is pushing the boundaries in Flash/Interactive. I have 5 years work experience varying between Full/Part-time and contract website development.

I am keen to learn new skills and have always had great feedback from work peers about my work. I learn quickly and enjoy having experienced developers around to both 'sponge' from and bounce ideas towards.

I think I bring a fun and hardworking ethic to the work place. I really enjoy trying new things, whether it is digital or real. I am a fan of sports, tattooing, beaches, Flash Player 10.2 (that looks too rad).
